(Q2) (Ans)

use of external CSS :-

The external style sheet is generally used when you want to make changes to multiple pages. It is ideal for this condition because it facilitates you to change the look of entire web site by changing just one file.

example:

```
<head>
```

```
<link rel = "stylesheet" type = "text/css"
      href = "mystyle.css">
```

```
</head>
```

mystyle.css

```
body
```

```
{
```

```
background-color: lightblue;
```

```
}
```

```
h1
```

```
{
```

```
color: navy;
```

```
margin-left: 20px;
```

```
}
```
